Hotels

The following hotels are available for participants in the LANL NCSP T&EP course. The recommended hotels are noted with an asterisk (*).

Transportation

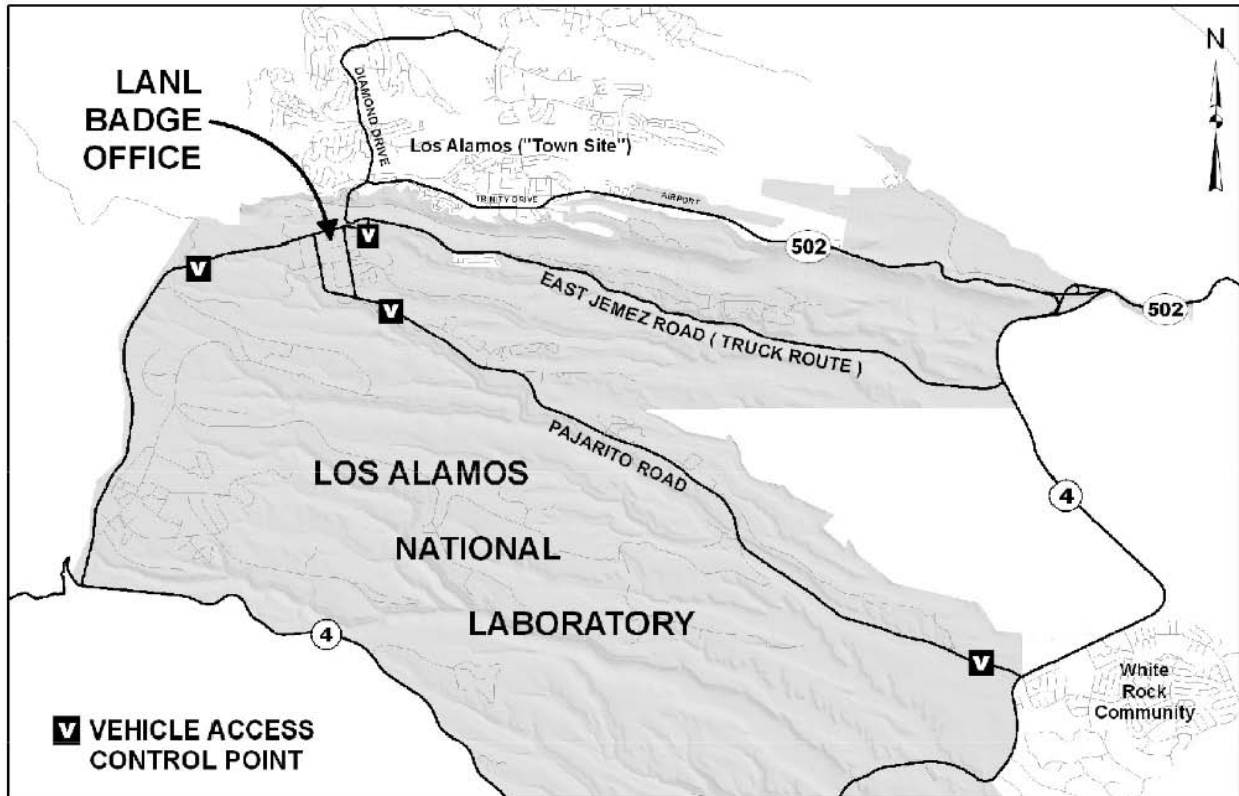

There is a bus service (Atomic City Transit – <http://www.losalamosnm.us/transit/Pages/default.aspx>) in Los Alamos County provided at no cost.

Because of road construction throughout Los Alamos County, it is recommended that course attendees allow sufficient time to arrive at LANL.

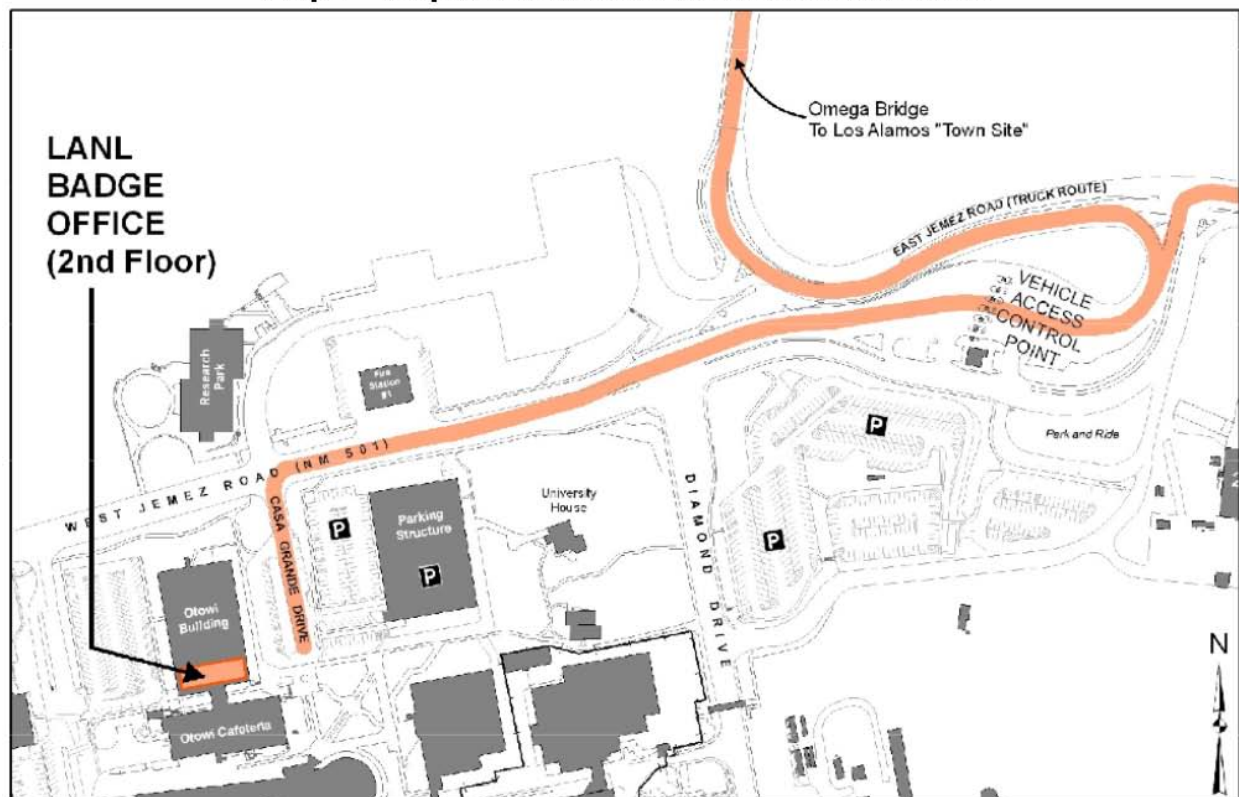

MAPs to the **LANL Badge Office** are provided below. There should be no issues with access to the laboratory as long as the attendees have a DOE standard badge. There is a vehicle access control point shown on the map. In most cases, the attendees can drive through this control point but it is possible that you could be stopped for a vehicle inspection. Simply cooperate with laboratory security during this process, if necessary.

The second map shows the location of the LANL badge office (2nd floor of the Otowi building). It is highly recommended that attendees park in the parking structure shown on the map across the parking lot from the Otowi building. Early arrival ensures that you can obtain a parking spacing in the parking structure. The 3rd floor of the Otowi building has a cafeteria that is open for breakfast. A course representative will meet the course attendees in the badge office and will direct the attendees to the classroom at the J. Robert Oppenheimer Study Center (adjacent to the parking structure and across the courtyard from the Otowi building, as shown in the third map).

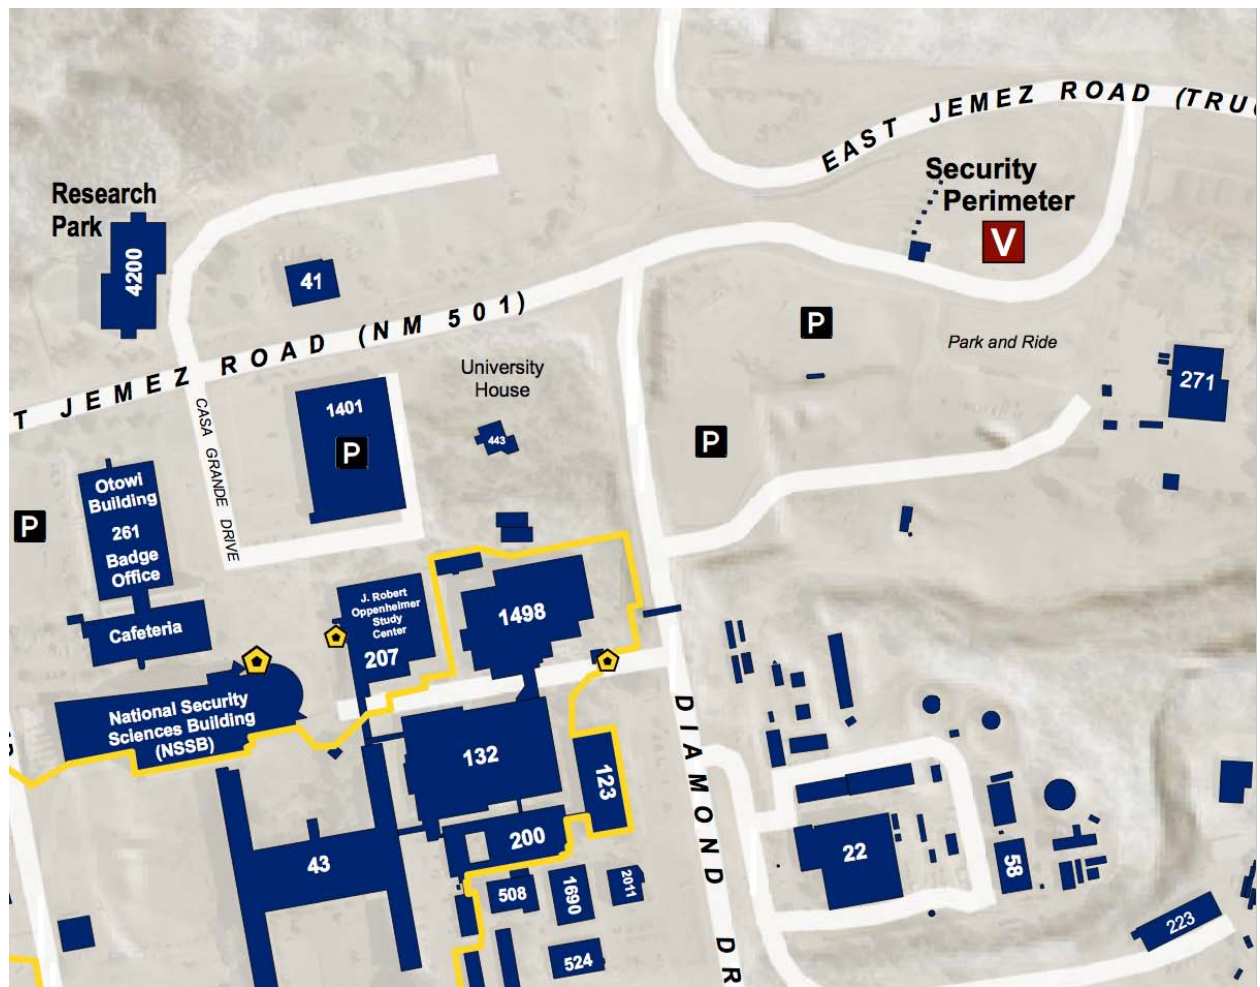

Map 2 - Access to LANL Coming from the Townsite Map 3 - Location of Otowi Building (Building

Map 1 - Map of the Los Alamos Townsite and LANL

261), Parking Structure (Building 1401) and the J. Robert Oppenheimer Study Center (Building 207)
